

## SAP Information Steward

*A tool for Data Governance and understanding how the quality of your data impacts your business.*

### July 20, 2016, 12pm - 2pm

This Lunch and Learn is designed as a tutorial for navigating all the components of Information Steward, with particular emphasis on Data Insight and Metadata Management. Other topics to be included are; Data Quality Dashboards & Scorecard Navigation, Financial Impact Analysis, Basic and Advanced Data Profiling, and Basic Validation Rule Construction. This walkthrough focuses on the most common applications of Information Steward and hopes to address the most frequently asked questions as well.

- Monitor, analyze, and improve data integrity with SAP Information Steward
- Combine data profiling and metadata management tools for continuous insight into the quality of your enterprise information.
- Realize the impact of data quality on your business processes so that you can enhance data governance initiatives

This session should be attended by any company looking to improve data quality and data governance across all applications, data warehousing and BI activities and do not need to be running any other SAP or Business Objects products.

### Session Information:

12:00 - 2:00pm

**In Person:** Lunch will be provided. Hands-on experience with Information Steward 4.2 in our training lab, located in Waltham, MA. Seating is limited to the first 15 people that register.
